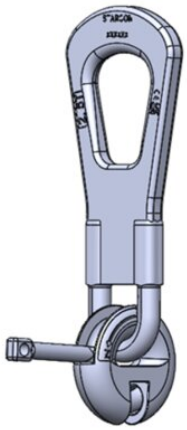
Starcon Ring Clutch

Product information



The Starcon ring clutch is a specially designed component with a bolt-shaped ring that grips the hole of the Starcon STA anchor. It enables quick and secure mounting of the ring coupling to the STA anchors by means of a locking bolt that mechanically locks to the anchor.

The ring coupling can be easily connected to a sling or hook, making lifting both fast and safe. It is ideal for use with lifting equipment and cranes, ensuring efficient and reliable handling of concrete elements.

Areas of application: The Starcon ring clutch is used for lifting Starcon STA anchors
Advantages: Ensures handling of concrete elements.
Enables safe lifting in all directions.
Quick and easy installation.
Load group: 2.5t – 10t
Technical information: CE marking according to MD 2006/42 EF
Starcon product is designed according to EN13155-2009 and follows the guidelines of VDI/BV-BS 6205 and DS/CEN/TR 15728.
