Ergo Quick’nDry 2-part 50mm

Product information

Ergo Quick´n Dry is developed together with drivers and especially designed for open load carriers.
The Dry webbing is made from impregnated polyester to repel water and dirt for increased durability. The webbing is therefore always soft and flexible which prevents frozen webbings even during winter time.
The ratchet is designed with inverted tension to create a natural working movement and gives 50% higher tension compared to a regular lashings. This means that you can reduce the number of lashings when using top-over lashings for cargo securing
