

Pipe and Test Sealing Bag

Product information

The sealing bags are suitable for all kind of pipe dimensions, models and materials. The operating pressure is between 0,5 til 6 bars depending on size and pressure in the pipe. Can be used to prevent or reroute sewagewater from reaching the groundwater or for bypass when repairing or pressure testing a pipe. Can also be used as a help when welding two pipes together by using the Vetter bag as a fix for the pipe ends.

All pipe sealing bags are available as test sealing bags with one or two bypasses. Need more information or help with choosing the correct model? Please contact us.

Material: Vulcanized reinforced rubber.

Temperature range: -20°C up to +90°C.

Note: For more information please contact your CERTEX office.
