

## Load tests

### Product information

At CERTEX, we perform lots of test draws, ranging from validation of lifting equipment to tests and quality checks of suppliers' products. In addition to this, we can also help you as a customer with validation of your own lifting equipment.

Our workshop in Täby is equipped with a pulling bench with a capacity of up to 60 tons. It is calibrated by Rise and meets the requirements of SS-EN ISO 7500-1.

Examples of load tests:

- Steel wire rope and chains
- Round slings and webbing slings
- Roping, mooring rope and hawser
- Lifting beams and lifting devices
- Welded or forged constructions

Send a quote request or book by filling out the form below, and we will contact you!
