Turnbuckle

Product information

Heavy-duty tensioning device designed for securing cargo in container and RoRo lashing systems. It is used with lashing chains, steel wire rope, and lashing bars to apply controlled tension and maintain load stability during transport. Built for repetitive use in demanding marine and transport environments.

Best for:

- Container lashing systems using 13 mm lashing chain
- Marine, RoRo, and intermodal transport securing applications

Product benefits:

- High tensile steel construction supports demanding load securing conditions
- SWL 100 kN with 200 kN breaking load enables predictable tensioning capacity
- Open-body design allows fast adjustment and visual inspection
- Hook-to-hook configuration simplifies connection in lashing setups
- Compatible with 13 mm lashing chains for standard container systems
