

Track Hook

Product information

The track hook is a specialised lifting tool designed for handling and moving continuous tracks on excavators and pile drivers. Its thin profile allows easy insertion between track segments, enabling controlled lifting and positioning during maintenance and assembly work.

Best for:

- Lifting and positioning continuous tracks on heavy equipment
- Maintenance and installation of excavator or pile driver tracks

Product benefits:

- 20 mm plate construction provides strength with a thin profile
- Slim design allows easy insertion between track segments
- Integrated handle improves handling and positioning control
- Connection hole fits 10 mm link for secure attachment

Material: Sheet metal of extra high-tensile construction steel.

Marking: CE-marked, WLL

Finish: Painted.

Safety factor: 4:1.
