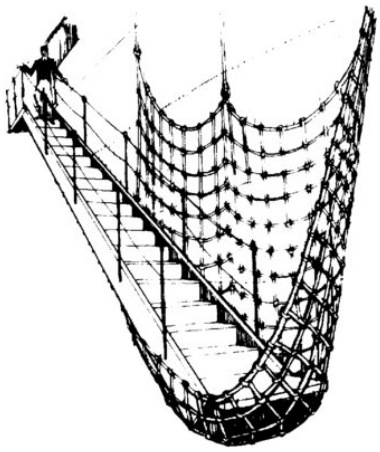
Gangway Net

Product information



The gangway net is a protective safety net installed alongside gangways to reduce the risk of falling during vessel access. Manufactured from polypropylene mesh with a reinforced perimeter frame, it provides a lightweight and durable barrier for marine and port operations.

Best for:

- Vessel gangways requiring fall protection during boarding
- Port, offshore, and marine access points

Product benefits:

- 3 mm polypropylene mesh provides lightweight fall protection barrier
- 10 mm perimeter frame improves structural strength and shape retention
- Synthetic material resists moisture and typical marine exposure
- Flexible construction allows easy installation along gangways
