

## Powermix

### Product information

**Typical application:** Mooring

**Generally:** Due to a technically reinforced composition of high tenacity superdan and polyester yarns has retained its superior strength. When combined with a unique double construction cover yarns, this composition provides superior abrasion resistance compared to conventional constructed ropes.

**Fiber Content:** Superdan and Polyester fiber

**Specific Gravity:** 0.99 (Float)

**Melting Point:** 165°C/265°C

**Water Absorption:** 0~1%

**Elongation at break:** 18~20%

According to INTERTANKO:s and OCIMF:s guidelines

**Rope construction:** 8-strand (4x2)
