Installation of fall protection systems

Product information

CERTEX offers expert solutions for the installation of permanent fall protection systems in existing structures, tailored to your specific needs.

During a site visit, we carefully assess which type of system and manufacturer best suits your business. After installation, we provide a complete installation and final inspection report. All installations and final inspections are carried out by certified personnel trained directly by the respective manufacturer.

We also offer the statutory inspection, which must be performed at least once every 12 months for permanent systems and PPE equipment, if desired.

To facilitate and ensure compliance with applicable regulations, CERTEX offers customized inspection agreements, where we manage the entire process and remind you when it’s time for the next inspection.

Contact us at service@certex.se for more information.
