

CCL XL Grip

Product information

Open grip for prestressed strand. The grips are for multiple use. It comprises a barrel and a wedge in three segments. The wedge segments are held together with an 'O' ring.

Best for:

- Prestressed strand anchoring in construction and tensioning systems
- Applications requiring reusable gripping components

Product benefits:

- Three-segment wedge design ensures secure strand gripping under load
- Barrel construction supports consistent load transfer and alignment
- O-ring holds wedge segments together for easier handling and installation
- Reusable design supports repeated use in prestressing operations

Part code	Code	Rope diameter mm	Max load kN	A,	B,	Weight kg	Delivery time
