

Steelite / Steelite Xtra, Pleated

Product information

General: The Steelite rope can in most cases replace the steel wire rope in winches, ropes for towing and also in theaters. The breaking force is the same as a steel wire rope of equivalent dimension but steelite also floats on water.

Design: 12 pleated (non rotating).

Markings: Steelite - black/lime, Steelite Xtra - black/pink.

Specific gravity: 0,97 (floats).

Melting point: aprox. 150°C.

Material: Dyneema® (SK60 or SK75), has very good resistance against UV-radiation, low water absorption and does not shrink in cold water.

Finish: White, coloured on request.

Part Code	Diameter mm	Min. Breaking force kN.	Mass g/m	Weight kg/220m	Delivery time
