Steel Plate Lifter

Product information

General: The lifting equipment is designed for horizontal lifting of one or more plates of the same width. The equipment consists of two fork lifters and a 4-leg chain sling. Always delivered complete.
Design: Cut reinforced plate forks together with weld assembled pipes gives optimal dimensioning and low weight. The geometry is adjusted to prevent the forks tilting from the plate as long as the minimum lift height is followed according to the table.
Proof: Batch proof 1,5 x WLL.

... *Read more*

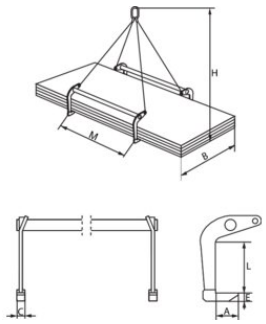

Material: Plate and pipe of high-strength structural steel
Marking: CE-mark, Badge with Type, WLL, maximum plate width
Finish: Yellow painted
Note: Please be aware that the H measurement represents the minimum required lifting height.
Warning: We recommend other lifting equipment for thin plates that can bend during the lift.
