Vertical Lifting Clamp IPU10H

Product information

The Crosby IPU10H vertical lifting clamp is designed for lifting, turning and transferring steel plates and fabrications with a surface hardness up to 472 HV10 (450 HB). Its hinged hoisting eye allows lifting from different directions without side-loading the clamp, while the 180° turning range supports controlled movement between horizontal and vertical positions.

Best used for:

- Handling hard steel plates and fabrications with surface hardness up to 472 HV10 (450 HB).
- Vertical lifting, positioning and 180° turning operations in industrial workshops and fabrication facilities.

Product benefits:

- Hinged hoisting eye accommodates different lifting directions without side-loading the clamp.
- Lock-open and lock-closed latch supports secure engagement and controlled release.
- Welded alloy steel body provides strength in a compact construction.
- Individually proof tested to twice the WLL, with test certification included.
- Individually serialized with documented proof testing for equipment traceability

Material: Alloy steel
Marking: According to standard, CE-mark, WLL, Logo, Type, Jaw opening, Serial number, Proof load test date
Temperature range: -40°C (-40°F) up to +100°C (+212°F)
Standard: EN 13155
Note: Min. load is 10% of WLL.
